About Edentity Extranet Identity Management Service

Extranet Identity Management Service is part of the Edentity Program, an integrated set of Sanofi identity and access management (IAM) services.

It is designed to manage User Identities and associated Active Directory accounts of **Extranet Users** -- Sanofi business partners, such as health care professionals (HCPs) and others -- who are external to Sanofi but need to **access business data** on the Sanofi network

What the service offers:

A secure **Sanofi network account** for accessing information and applications on the Sanofi network offering different levels of access based on requirements

Sponsors invites users to establish a Sanofi ID

Improved **self-service capability** to:

Unlock your account

Reset your Sanofi network password

Request activation or de-activation of your Sanofi account

How does the service work?

What Extranet Users Need to Do, and How

Enroll in the Edentity Extranet Identity Management service.
